Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/864,000

Applicant(s)

AKI ET AL.

Examiner

LaShonda T Jacobs

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) _____ is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

This Office Action is in response to Applicants' Amendment and Request for Reconsideration filed on October 29, 2004. Claim 1 has been cancelled. Claims 2-10 have been amended and are presented for further examination. Newly added claims 11-12 are also presented for further examination.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-6 and 9-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants have used a contradictory statement "and/or". Examiner will use the "or" statement.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2157

4. Claims 2-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mohaban et al (hereinafter, "Mohaban", 6,718,380) in view of Haddock et al (hereinafter, "Haddock", 6,104,700).

As per claims 5 and 9, Mohaban discloses a computer-readable medium storing a program for monitoring activities on a network, the program causing a computer system to function as:

- monitoring policy setting means for setting a monitoring policy (col. 10, lines 45-67, col. 11, lines 1-13 and col. 12, lines 15-29);
- monitoring means for monitoring the network according to the policy set in said monitoring policy setting means (col. 10, lines 45-67, col. 12, lines 15-29 and lines 56-67); and
- monitoring policy changing means for changing current policy being set in said monitoring policy setting means, according to a monitoring result reported by said monitoring means (col. 12, lines 12-29, lines 49-67 and col. 13, lines 14-23).

However, Mohaban does not explicitly disclose:

- wherein the monitoring policy changing means increase the frequency of monitoring and adds a new object and/or item to the coverage of the monitoring, when degradation in service level of the network is observed.

Haddock discloses a policy-based mechanism for managing, monitoring and prioritizing traffic with a network including:

- wherein the monitoring policy changing means increase the frequency (delay or bandwidth) of monitoring and adds a new object and/or item to the coverage of the

Art Unit: 2157

monitoring, when degradation in service level of the network is observed (abstract, col. 9, lines 43-64 and col. 10, lines 13-27).

Given the teaching of Haddock, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Mohaban by adding a packet to the queue (Figure 3 of Mohaban) when the bandwidth increases in order to achieve a true quality of service on a network).

As per claim 2, Rogers discloses:

- wherein the monitoring policy includes a parameter that specifies how frequently the monitoring will be conducted (col. 10, lines 45-67, col. 12, lines 56-67 and col. 16, lines 56-65).

As per claim 3, Rogers discloses:

- wherein the monitoring policy includes a parameter that specifies which object to monitor (col. 10, lines 45-67, col. 12, lines 56-67, col. 16, lines 56-65 and col. 22, lines 50-57).

As per claim 4, Rogers discloses:

- wherein the monitoring policy includes a parameter that specifies which item to monitor (col. 10, lines 45-67, col. 12, lines 56-67, col. 16, lines 56-65 and col. 22, lines 50-57).

As per claims 6 and 11, discloses a computer-readable medium storing a program for monitoring activities on a network, the program causing a computer system to function as:

- monitoring policy setting means for setting a monitoring policy (col. 10, lines 45-67; col. 11, lines 1-13 and col. 12, lines 15-29);

Art Unit: 2157

- monitoring means for monitoring the network according to the policy set in said monitoring policy setting means (col. 10, lines 45-67, col. 12, lines 15-29 and lines 56-67); and
- monitoring policy changing means for changing current policy being set in said monitoring policy setting means, according to a monitoring result reported by said monitoring means (col. 12, lines 12-29, lines 49-67 and col. 13, lines 14-23),

However, Mohaban does not explicitly disclose:

- wherein the monitoring policy changing means decreases the frequency of the monitoring and withdraws an existing object and/or items from the coverage of the monitoring, when improvement in service level of the network is observed.

Haddock discloses a policy-based mechanism for managing, monitoring and prioritizing traffic with a network including:

- wherein the monitoring policy changing means decreases the frequency (delay or bandwidth) of the monitoring and withdraws an existing object and/or items from the coverage of the monitoring, when improvement in service level of the network is observed (abstract, col. 9, lines 43-64 and col. 10, lines 13-27).

Given the teaching of Haddock, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Mohaban by removing a packet from the queue (Figure 3 of Mohaban) when the bandwidth decreases in order to achieve a true quality of service on a network).

As per claim 7, Rogers further discloses:

Art Unit: 2157

- storing a program which causes the computer system to function as resource setup changing means for changing a setup of a predetermined set of resources on the network according to the monitoring result reported by said monitoring means (col. 12, lines 12-29, lines 49-67 and col. 13, lines 14-23)

As per claim 8, Rogers further discloses:

- storing a program which causes the computer system to function as event detecting means for detecting the occurrence of a particular event in a predetermined resource on the network, wherein said monitoring policy changing means changes the current monitoring policy in response to the particular event detected by said event detecting means (col. 12, lines 12-29, lines 49-67, col. 13, lines 14-23 and col. 22, lines 50-57).

As per claim 10, Rogers discloses a method of monitoring activities on a network, comprising the steps of:

- (a) setting a monitoring policy (col. 10, lines 45-67, col. 11, lines 1-13 and col. 12, lines 15-29);
- (b) monitoring the network according to the policy set at said step (a) of setting (col. 10, lines 45-67, col. 12, lines 15-29 and lines 56-67); and
- (c) changing the current monitoring policy that is originally at said step (a) of setting, according to a monitoring result obtained at said step (b) of monitoring (col. 12, lines 12-29, lines 49-67 and col. 13, lines 14-23),

However, Mohaban does not explicitly disclose:

Art Unit: 2157

(d) increasing the frequency of the monitoring and adding a new object and/or item to the coverage of the monitoring, when degradation in the service level of the network is observed.

Haddock discloses a policy-based mechanism for managing, monitoring and prioritizing traffic with a network including:

(d) increasing the frequency (delay or bandwidth) of the monitoring and adding a new object and/or item to the coverage of the monitoring, when degradation in the service level of the network is observed (abstract, col. 9, lines 43-64 and col. 10, lines 13-27).

Given the teaching of Haddock, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Mohaban by adding a packet to the queue (Figure 3 of Mohaban) when the bandwidth increases in order to achieve a true quality of service on a network).

As per claim 12, Rogers discloses a method of monitoring activities on a network, comprising the steps of:

(a) setting a monitoring policy (col. 10, lines 45-67, col. 11, lines 1-13 and col. 12, lines 15-29);

(b) monitoring the network according to the policy set at said step (a) of setting (col. 10, lines 45-67, col. 12, lines 15-29 and lines 56-67); and

(c) changing the current monitoring policy that is originally at said step (a) of setting, according to a monitoring result obtained at said step (b) of monitoring (col. 12, lines 12-29, lines 49-67 and col. 13, lines 14-23),

Art Unit: 2157

(d) decreasing the frequency of the monitoring and withdrawing an existing object and/or item to the coverage of the monitoring, when improvement in the service level of the network is observed.

However, Mohaban does not explicitly disclose:

- (d) decreasing the frequency of the monitoring and withdrawing an existing object and/or item to the coverage of the monitoring, when improvement in the service level of the network is observed.

Haddock discloses a policy-based mechanism for managing, monitoring and prioritizing traffic with a network including:

- (d) decreasing the frequency (delay or bandwidth) of the monitoring and withdrawing an existing object and/or item to the coverage of the monitoring, when improvement in the service level of the network is observed (abstract, col. 9, lines 43-64 and col. 10, lines 13-27).

Given the teaching of Haddock, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Mohaban by removing a packet from the queue (Figure 3 of Mohaban) when the bandwidth decreases in order to achieve a true quality of service on a network).

Response to Arguments

5. Applicant's arguments with respect to claims 2-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 2157

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 6,453,268 to Carney et al

U.S. Pat. No. 6,484,261 to Wiegel

U.S. Pat. No. 6,678,835 to Shah et al

U.S. Pat. No. 6,028,842 to Chapman et al
